

Professional Profile

I work at the intersection of finance, operations, and data: building the models and reporting systems used to evaluate investments, manage performance, and support commercial decisions.

My experience spans project finance, FP&A, financial automation, international expansion, and economic analysis across Europe, the United States, and Southeast Asia.

Current Focus

 May 2023 – Present

FP&A / Data Analyst · Anchor CFO

Anchor CFO is a fractional CFO and strategic finance advisory firm supporting growing businesses with financial planning, investment analysis, capital allocation, and executive decision support. Working across hospitality, food & beverage, real estate, and tourism, I build financial models and analytical tools used to evaluate investments, support transactions, and improve operational decision-making.

SELECTED WORK

- Supported the financial due diligence process for an M&A transaction resulting in more than \$30 million in exit proceeds, coordinating financial documentation and analysis across multiple workstreams.
- Contributed to investment memoranda and financial evaluations supporting over \$2 million in capital investments across multiple projects and funding rounds.
- Built underwriting, cash-flow, and development models for real estate projects representing more than \$20 million in projected proceeds, including scenario analysis, construction planning, and return evaluation.
- Developed budgeting, forecasting, cash-flow, and performance-reporting models for hospitality, F&B, tourism, and real estate businesses with EBITDA ranging from approximately \$1 million to \$6 million.
- Supported strategic expansion initiatives across Southeast Asia through financial modelling, market analysis, and operational planning.

- Financial modeling · M&A data coordination
- Investment memos
- CAPEX & scenario planning · Power BI
- SQL (Salesforce) · Python (ETL)
- Forecasting & budgeting
- Cash-flow modeling
- Multi-stakeholder project management
